Subject: USS Lead - Zone 2 - LIDAR Street Survey Work - May 18-19th

Good Morning Will,

Per my voicemail, as you know the Zone 2 residential remediation work at the USS Lead Site will be conducted by the PRP Group and their contractors this construction season. Parsons is the prime contractor, and they were represented at our last community meeting held in April. Next week (May 18-19th), Parsons will have a subcontractor (CEC) conduct LIDAR surveys and video documentation of all roadways within Zone 2 prior to the commencement of any digging and hauling work. Below is a photo of the rig that they will be using to conduct this work. In addition, they will be painting temporary markings (2nd picture) at each intersection.

We are also reaching out to community groups to help get the word out to the residents about this truck to help mitigate any concern from the public while the work is occurring next week.

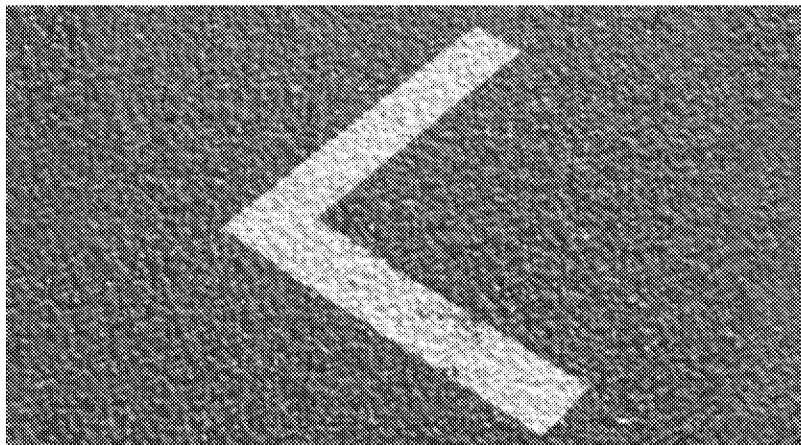

Please let us know if you have any questions or concerns.

Thx
Dan

On May 18 and May 19th CEC Corporation will be doing some pavement surveying with the vehicle pictured below.

CEC will be painting temporary white triangles at intersections.

Dan Haag, CHMM
